

Free Rinsing & Low-foaming Nitrite-free Detergent

FEATURES

- **Biodegradable**
- Low foaming
- Flash rust protection
- Safe on most metals
- No turpines
- No nitrites
- Non-flammable
- Oil-splitting
- Safer for employees and the environment

APPLICATIONS

- Light oils
- Finger prints
- Light Flux
- Chips

TYPICAL PARTS CLEANED

- Newly machined parts
- Screw machine parts
- Printed circuit boards
- Finished products

EXAMPLES OF PARTS CLEANED

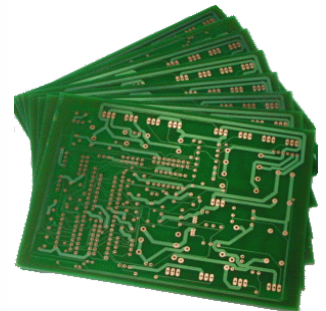

Specialty alloy castings

Brass screw machine parts

Chips and light oils on
newly machined parts

Circuit boards

RECOMMENDED USAGE

Temperature: 130 °F to 160 °F

Concentration: 2 - 5% by volume

Concentration and temperature may be adjusted to achieve maximum cleaning performance.

Note: When used in equipment fabricated from mild steel, RPA-445 should be used in conjunction with LDNA-445 to ensure sufficient protection against corrosion.
